# Geninfo Solutions Inc. opens Halifax Office

Published on October 11, 2013

## Geninfo Solutions Inc. open new office in Halifax

*Geninfo Solutions Inc. of Mississauga Ontario, is marking its 5th anniversary in Canada by expanding its offerings to the East Coast with the opening of a new office in Halifax, Nova Scotia.*

*Geninfo has been offering BIM services to the building industry in Ontario for the past five years where they have earned the trust of their customers ranging from Building owners, General Contractors, Mechanical Contractors, Engineers and Architects alike. Initiatives have included modelling and coordination of Hospitals, Data Centres, Universities and a host of Commercial and Industrial projects.*

*BIM, among other things, is a 3D virtual build of a construction project and is used to identify design flaws or clashes that can be corrected prior to construction. This approach allows the stake holders to mitigate the risks involved with construction and potentially save millions of dollars by avoiding costly change orders and shutdowns at the job site.*

*Co-Owners Naresh Chawla and Hugh Munro are very excited to be located in Halifax and look forward to offering their services to the building community of Atlantic Canada. [www.geninfosolutions.com](http://www.geninfosolutions.com)*
